Week B

Prayer

Holy Spirit, Guide us through this week.

Help us to use the talents You have given us to serve others and to be the best versions of ourselves.

We offer You our successes and our challenges today.

Keep us safe, keep us curious, and keep us close to You

Amen

The Nature - Nurture Dichotomy

You must likely have heard it before. And in philosophical and sociological terms has -until very recently- been mainly presented as two all encompassing but conflicting theories: darwinism or marxism?

But what lies beyond this polarity is our capacity to change our social destinies, even our identities. Which one of you still thinks that we are forever restricted by our own limitations and our social background or upbringing? How much can be say it is just social conditioning and the continuation of expected social and gender stereotypes?

Three Fundamental Questions for You to Answer

- How would you define "nature" and "nurture" in the context of human development? Are there any overlaps or grey areas between these two concepts?
- If you had to pick one, which do you instinctively believe plays a more significant role in shaping who we are: our genetic inheritance or our upbringing and environment? Why?
- Also, can you think of specific human traits, behaviors or abilities that seem to be primarily influenced by nature? What about those primarily influenced by nurture?

Nature vs Nurture

But Before Answering Consider These

- **Intelligence:** Is intelligence primarily inherited, or is it more a product of educational opportunities and environmental stimulation? How might both play a role?
- **Personality:** To what extent is our personality (e.g., introversion/extroversion, agreeableness) determined by our genes versus our early childhood experiences and social interactions?
- **Talent and Skills:** Are people "born with" musical talent or athletic ability, or are these developed through practice, training, and opportunity? Where does natural aptitude end and learned skill begin?

Think of the Ethical Dimension

- **Responsibility:** If our actions are heavily influenced by our genes, does that lessen our personal responsibility? What if they are heavily influenced by our upbringing?
- **Social Policy:** How might our understanding of nature and nurture influence social policies related to education, welfare, or criminal justice? For example, if nurture is more important, what should society prioritize?
- **Personal Growth:** How does understanding the interplay of nature and nurture empower individuals to make changes in their lives or pursue personal growth?
- **The Future:** As our scientific understanding of genetics and environmental influences grows, how might the nature vs. nurture debate evolve in the future?

Further Considerations

- **Intertwined Concepts:** Is it even possible to truly separate nature and nurture, or are they inextricably intertwined? Can one influence the expression of the other? (e.g., epigenetics)
- **The "Both" Argument:** Most scientists agree that both nature and nurture play a role. If this is the case, what is the value in continuing to debate which is "more important"?
- **Beyond the Dichotomy:** Are there other factors, beyond just nature and nurture, that contribute to who we are? (e.g., free will, unique life experiences not directly tied to upbringing).

Have you Heard of Epigenetics?

BOOK RECOMMENDATION OF THE WEEK

DON' T FORGET TO CHECK
OUT ALL OUR NEW BOOKS
IN NF2. WHY DON' T YOU
WRITE A REVIEW?

Twelve-year-old Nick is a football-mad boy who absolutely hates books. In this follow-up to the Newbery-winning novel *The Crossover*, football, family, love, and friendship take centre stage as Nick tries to figure out how to navigate his parents' break-up, stand up to bullies, and impress the girl of his dreams. These challenges – which seem even harder than scoring a tie-breaking, game-winning goal – change his life, as well as his best friend's. This energetic novel-in-verse by the poet **Kwame Alexander** captures all the thrills and setbacks, the action and emotion of a World Cup match.
